Job Title: Head of Security & Operations  
Function: Security  
Job Group: Operations  
Duty Station: Erbil, Iraq with frequent travel to Ninewa and Kirkuk  
Administrative Line Manager: Head of Mission  
Line Management Responsibility: Security Manager and Operations Manager

**JOB PURPOSE:**

The Head of Security and Operations is responsible for overseeing all operational functions, including logistics, procurement, fleet management and IT, as well as security analysis and advice for NP Iraq. This will be achieved through expanding and maintaining the skills and motivation of the team to analyse and manage security and to secure a safe working environment. This position plays a key role on the SMT, particularly as relates to security and risk. S/he will provide the Head of Mission with consistent, in-depth safety and security advice, threat assessment and develop and maintain robust country security policy and procedures, SOPs and Contingency Plans. This position interacts with all other functions as well as the field-based program teams. The position includes on-site security support and capacity building to field staff and ensuring that all staff are aware of and trained in the Standard Operating Procedures and related skills necessary for compliance.

**KEY OBJECTIVES/RESPONSIBILITIES:**

**Security:**

* **Security Information Collection, Management and Communication**
  - Lead security information gathering, collation and dissemination from a range of local and international sources and produce formal security updates
  - Maintain close contact with all relevant stakeholders to develop a network and build relationships with key actors – NGOs, INGOs, UN and government agencies, security forces and other armed actors
  - Monitor and analyse the security situation, ensuring reliable security information as basis for informed decision-making and maintain a map and log of critical security incidents to support security decision making and ensure staff and management are aware of the issues
  - Provide security context analysis and daily security updates and rapidly communicate relevant security information, analysis and recommendations to SMT and staff
  - Provide on-the-ground security advice and ensure situational awareness to mitigate risks to programme staff in the field
  - Support risk analysis for the country program as a whole, advise the SMT on security-related issues
  - Ensure that a centralized filing system of security-related documents is maintained and available to the appropriate staff.

* **Risk Mitigation and Management**
  - Facilitate an ongoing culture within the wider team of security awareness and ownership, and commitment to the procedures and to each other and arrange ongoing training as a key strategy for improved security conditions
  - Produce and ensure adherence to SOPs, contingency plans and risk assessment documentation, ensuring these are up to date and in line with required standards
  - Recommend new protocols, or adjustments to procedures, to improve effective risk mitigation and support drafting of such as necessary
  - In coordination with SMT, ensure that all staff are aware of, and trained in, the procedures detailed in NP security documentation and Standard Operating Procedure documents
  - Lead security assessments in potentially high-risk new programme locations, or travel routes, to make recommendations regarding movements (Go-No-Go) and required risk mitigation steps required if movements are cleared
  - Review standard requests for travel to new locations (regardless of security risk level) or repeat travel to high risk locations
  - Advise on, and develop, contingency plans for critical incidents, including issues like hibernation, medevac, evacuation, vehicle injury accidents, among others and work with staff to prepare for those contingencies.
